

Movavi SplitMovie 2 is a fast and easy-to-use video trimming and splitting program: cut and save episodes from movies or split large files into individual segments.

- Split, cut and trim AVI, MPEG, MOV, ASF, and WMV video files.
- Save split video fragments to AVI, MPEG, RM or WMV.
- Split video automatically by size, duration or number of segments.
- Cut video manually, selecting the start and end points for each segment.
- Select as many video fragments as one need, including the intersecting fragments.
- Save time with Movavi's unique fast-splitting technology.
- Don't sacrifice video quality — save to AVI and MPEG without recompression.
