

Movavi Video Converter 3D offers a comprehensive set of tools for converting any usual 2D videos to 3D. Supporting all currently available 3D modes such as anaglyph or shutter glasses technology, the software can be used with the new 3D TVs as well as with standard displays and 3D glasses.

- Automatic conversion from 2D to 3D.
- Instant preview of 3D output.
- HD-video ready.
- Support of polarization glasses, shutter technology (NVIDIA), and anaglyph 3D glasses.
- Support of 3D TVs, NVIDIA 3D Vision Glasses Kit, and 120 Hz displays.
- Ready-made predefined settings for various devices and the web (iPad, YouTube, PlayStation PS3, Xbox 360 etc).
- Batch file processing.
- Automatic brightness feature.
- 3D depth and shift effect adjustment.
- CPU acceleration on 2010 Intel Core processors.
- GPU acceleration with NVIDIA CUDA (encoding only).
